

How do we create your *Forever Home*?

As a division of CGU Homes, CGU Forever Homes is the first company to take ADA design to a high-end, personalized level to help homeowners age in the comfort of their own home.

We work together with Certified Occupational Therapists to fully understand the clients' needs before tailoring customized design solutions for the home.

At CGU Forever Homes, we believe that giving homeowners the option to safely age in place at home without the *necessity* to live in an environment that feels like a hospital is an essential choice for every person seeking alternatives to safer living.

Who We Are

Kempton Rimes and a team of Certified Occupational Therapists combine their individual expertise in construction and Occupational Therapy to smoothly facilitate the CGU Forever Homes experience.

Kempton, a 6th generation Naples native, uses his 12 years of local construction experience to design and oversee the construction of CGU Forever Home Projects. Kempton has managed a variety of projects from small, custom remodels to large commercial builds. He specializes in high-end design problem solving.
